YSGA Public Comment: Well Permit Verification Procedures

Good Afternoon,

This notice is to notify you that the YSGA has opened a public comment period for the YSGA's Well Permit Verification Procedures.

Comments will be accepted on the (1) the Focus Areas Map and (2) the Tiered Permit Review Technical Memorandum until April 2, 2024.

The [Focus Areas map](#) was prepared using various hydrologic data, reported citizen concerns, and professional judgement to delineate areas in the Yolo Subbasin that may be sensitive to groundwater pumping and warrant additional information and analysis. The Focus Areas are areas in the Yolo Subbasin in which well permit applicants that are not exempt from the Governor's Executive Orders may be required to submit additional information for the YSGA to review as part of the written verification process.

The Tiered Permit Review Technical Memorandum outlines the requirements and components of YSGA permit review within the Focus Areas and provides additional information on the Tier 1 and Tier 2 process: https://www.yologroundwater.org/files/1e14be054/7a_TM+-+HydrogeologistReport+-+20240314v2.pdf.

Please visit our website to access the comment form: <https://www.yologroundwater.org/public-comment-well-permit-verification-procedures>, and to obtain additional details on the process.

Feel free to reach out with any questions.

Thanks,

Kristin Sicke, P.E.
Executive Officer
Yolo Subbasin Groundwater Agency
